PROFESSIONAL PROJECTS

PET ADOPTION SYSTEM

Pet Adoption System is a web-based application developed using **Angular and MySQL** to connect pet adopters with animal shelters. It allows users to view available pets and submit adoption requests online. Administrators can manage pet details, user requests, and adoption status efficiently.

CLICK BASKET

An **E-Commerce Website** developed using **React and MySQL** enables users to browse products, add items to a cart, and place orders online. The system provides secure user authentication, order management, and payment processing features. Administrators can manage products, users, and sales through a centralized database.
